\* Heartgard Available for Dogs same price as Proheart  
\*Heartgard Feline \$43

I have read the Proheart 6 Client Handout:

\_\_\_\_\_

We understand that we have hit hard economic times. Therefore, we are offering vaccinations at a discounted price for a short period of time. There will be no doctor's exam included with this visit, and there is a \$3.00 medical waste disposal fee per pet. Treatment for any complications/reactions is not included in these prices. Please see the disclaimer on the back of this page, as your signature is required in order for us to perform these services. The invoice and rabies certificate will be the only proof of vaccinations that you will receive.

**Legacy Village Veterinary Clinic  
Vaccine and Microchipping Clinic Information & Waiver of Liability**

**Be sure to monitor your pet after vaccinations.**

Schedule vaccinations when you will be able to monitor your pet after the vaccines are administered. Any animal can have a vaccine reaction. Vaccine reactions can occur to pets of any age, breed or sex, even after the animal has had no prior uncomplicated vaccinations. If your animal has had a vaccination reaction in the past, please be sure to let the veterinary staff know before your animal is vaccinated

**Vaccine Reaction Alert**

What to watch for after your pet has been vaccinated:

**Vaccine reactions are not common, but can be very serious.** Vaccine reactions usually come in two forms.

- One form of vaccine reaction has symptoms like a bug bite. The most common signs are hives (bumpy skin) and/or swollen face. This can happen minutes to hours after the vaccine is given. Emergency treatment is needed.
- The other form of vaccine reaction happens much faster and is more serious. The animal will become very lethargic, may vomit, and may eventually collapse. The animal's gums may become very pale and the heartbeat may become slow and faint. This usually happens within 15 minutes of the vaccine being administered. Emergency treatment is needed IMMEDIATELY. Please go to the nearest Emergency Hospital.

**I hereby consent and authorize the licensed veterinarian, veterinary technicians, and/or their associated to provide indicated treatment to the animal listed above. Legacy Village Veterinary Clinic, volunteers, employees, veterinarians, veterinary technicians or assistants shall not be held liable or responsible, for any claims, liabilities, losses, damages, charges, fees, and expenses of any nature and character for which I or my animal/animals may sustain or incur by reason or on account of the attending, handling, treatments, vaccination, microchipping, worming or sample taking of the animal(s) listed above. The release relates to any and all liability for personal injuries or death, property damage or property loss, injury to or death of any animal, occasioned by or in connection with the activity related to this event. I authorize the use of vaccinations or treatments to be administered as indicated, and I am fully aware of the risks associated and assume all responsibility. Accordingly, hereby assure this Release From Liability as it is thoroughly understood that I have read and understand the aforementioned vaccine reaction information provided to me by Legacy Village Veterinary Clinic.**
